

## **Petition of Non-governmental Organizations, Public Figures and Intellectuals about the events in Vojvodina**

The representatives of non-governmental organizations, public figures and intellectuals from Vojvodina at the meeting “Talks about Vojvodina”, held April 18, 2013, at Novi Sad, have harmonized their views on the actual political moment in Vojvodina and agreed to send their statement in the form of petition to domestic and foreign public.

About 100 participants at the talks, the representatives of civil organizations, public figures and intellectuals from all parts of Vojvodina together came to the following conclusions, which are supported by numerous non-governmental organizations and prominent individuals from other parts of Serbia too (in the extension there are all signatories to the petition):

- The representatives of political parties in the Republic government in cooperation with other nationalist parties and extreme organizations including those officially banned continue with their policy of exerting pressure on Vojvodina and its people, which is in disagreement with the democratic principles and procedure in the legitimate struggle for power;
- The content of the draft Declaration on protection of constitutional and legal rights of the AP Vojvodina could not be the reason for organization of the rally “Stop disintegrating Serbia” and the media harangue against the representatives of legitimately selected provincial government for their alleged secessionism. Therefore, we believe that the intention of organizers was something else: the struggle for power and the struggle against the autonomous Vojvodina and its specific characteristics and also to divert attention of the public from the grave economic situation and the current negotiations about Kosovo.
- However, the truth is that rights of AP Vojvodina are being abolished for years and that the provincial government in the previous period lacked an active approach to secure rights and interests of AP Vojvodina. We nevertheless think that the provincial government should not succumb to the political and media pressures and that it should stay unified and adopt this Declaration regardless of its symbolic character;
- Actual events also show that the current Constitution is generating many problems not only in Vojvodina but also Serbia proper and that it is necessary to urgently initiate the procedure for a new Constitution. The supreme legal act should be the issue of the broad public debate and during its adoption it is necessary to respect democratic procedure and not, like in the case of current Constitution, allow and tolerate behind-the-scene political deals. The new Constitution should secure and clearly define the constitutional-legal position of Vojvodina in agreement with wishes and demands of its citizens and its European

spirit. This position should protect specific society of Vojvodina and enable its free development and political subjectivity;

- The rally “Stop disintegrating Serbia” was a total fiasco, which confirms the political maturity of citizens of Vojvodina and Novi Sad. They rejected the arguments of organizers and refused to participate in re-enacting the so-called ‘yogurt revolution’, which was an introduction into bloody criminal wars on the territory of former Yugoslavia; at the same time, the organizers of the rally actually granted legitimacy to the extreme organizations among which are also those officially banned, thus encouraging their anti-constitutional activities;
- The Republic government and political parties with similar organizations should immediately stop generating crisis in Vojvodina. Otherwise, they will be fully responsible for destabilization of political situation and security in the AP Vojvodina and for its consequences. Resolving political disagreement should be urgently returned to the institutions of state;
- We appeal to the representatives of the European Union, European Council, international organizations and the Serbian public to take a constructive attitude toward the current events in Vojvodina in order to prevent possible deep crisis that may result in unpredicted consequences;
- We ask from the relevant state organs to urgently uncover and reveal to the public the names of those who created poster calling for the death of president of the Vojvodina government, Bojan Pajtic and “his minions”;
- We protest against unprofessional reporting of the majority of media from the rally “Stop disintegrating Serbia” and its accompanying events. The majority of media was in function of nationalist propaganda, production of crisis and creating enemies through lies and fabrications. This confirms that the media in Serbia are controlled by the government with its coalition partners in realization of their common interests. The media and journalists should be aware of their own responsibility when reporting and especially they should keep in mind the horrible consequences which unprofessional and warmongering journalism had produced in the nineties. However, the media freedom in Serbia is being violated for many years and all previous governments are responsible for the current situation;
- We protest against the latest attacks on the media freedom in Vojvodina organized by the representatives of the ruling Serbian Progressive Party (SNS), with special accent on situation in the daily ‘Dnevnik’ and the weekly ‘Pancevac.’

*Novi Sad, April 23, 2013*
